A fun, light-hearted JRPG-like game.

If you enjoy old school Final Fantasy and such, you'll enjoy this.

Characters are likeable, music is amazing and the combat is fun.

The dungeons can get repetitive, but it's easy to forget about so it's not a big deal.

Considering how cheap it is, it's definitely worth the buy.

The main story + side quests can reach 15 - 20 hours depending on how speedy you are.
