

---

This is a helpful tutorial on how to install Windows 7 Loader on unsupported partition table. It is the most effective and easiest method for activating any Windows 7 editions without creating a new or expensive license key. This is an UnleashYourPCArticle Windows 7 Loader For Unsupported Partition Table: If you want to use this free utility instead of Activator, it's advisable to make sure your system has at least 1GB of RAM and 2 GBs of free disk space, as well as Intel CPU with HT enabled. All these are hard requirements for successfully installing Windows 7 Loader so please consider them before proceeding with the tutorial, otherwise you could experience difficulties during installation or activation after completion. You need : - Windows 7 Loader (W7L4U), downloaded from link provided on this tutorial - Windows 7 Product Key (Also download from link provided) - USB Flash Drive, 16GB or greater in size, formatted as NTFS with a total size of at least 1GB. Although USB 2.0 is faster than USB 3.0, the speed difference is negligible and the speed of a USB 3.0 flash drive is not enough to install or activate Windows 7 correctly - A PC running on installed with a Pentium 4 or above, with at least 512MB of RAM and 1GB free disk space. This would be required to install Loader as well as activating... - Patience :) Precautions: - Please make sure you have a valid product key. If you didn't, don't proceed with the tutorial. Otherwise, you'll risk getting a fake key along with a fake copy of Windows 7. We won't be held responsible for any damage caused by it. - Do not disable your Anti-Virus or Firewall as they might interfere or block Windows Loader from running properly. If it does, please enable them again after running the program as administrator anyway as it will save time and effort installing and activating later on. - Take your time when following this tutorial. The process: 1. First, extract the contents of Loader anywhere on your desktop and double-click the W7L4U executable (it'll extract in a lot of other files or folders that you don't want). After extraction, open the extracted directory and right-click on any empty space inside and select "Create Shortcut". Next, right-click on the newly created shortcut and select Properties. Click on the Compatibility tab and select Windows 7 from the list at bottom, then checkmark Run this program as an administrator. Click OK to close all windows. 2. Now, insert your USB flash drive into your PC and open the Properties of the USB flash drive. Go to the tab labeled "Security", then click Edit and select Users (or you can select Everyone if you're logged as a user). Now checkmark Full Control and apply all changes. 3. Now, go back to the directory where you extracted Windows 7 Loader earlier. Right-click on any empty space in this directory and select "Create Shortcut". Now, right-click on the new shortcut and select Properties again, this time heading to Compatibility tab . Next , click Select an operating system .
